Halloween Special 3: Eyeball Ice Cubes

Starring: Dracula

Eyeball Ice Cubes

- 1 jar Olives
- 1 pkg. Radishes
- Water
- Ice Cube Trays
- Potato Peeler

Using a potato peeler, remove the red covering from the radishes. Peel hap-hazardly so that the eyeballs look like they have veins.

Using a knife, cut out a small circular crevice at the top of the radish. Thinly slice an olive and place into this circular crevice to form a pupil.

Place the completed radish into the ice cube tray and fill with water. Place into the freezer overnight. The following morning you should awake to some creepy eyeball ice cubes that will have your guests screaming for more.... punch that is.
